

Your old alarm dialler is worth money!

Get € 100,- cashback on your purchase of an Octalarm-Touch

Octalarm-TOUCH

Prevent damage, replace your more than 10 year old alarm dialler and take advantage of our cashback promotion. With the Octalarm-Touch you enable secure and reliable alerts using today's (significantly changed) digital telephone networks; you are ready for the future!

Do you still monitor your processes with a Modalarm or Octalarm from the 1st and 2nd generation or T-series?

Sometimes, these devices are more than 15 years old and no longer guarantee a reliable alarm. Electronics are aging, the risk of failure increases and it is impossible to predict when the detector will fail. Waiting until this happens will result in a situation in which you are temporarily without an alarm dialler or worse, the system fails to work during a calamity. Failure of an installation can, for example, result in temperature drop or livestock suffocating. As a result of this, in addition to the huge emotional burden, there is also huge financial damage. Of course, that is not an option!

Most businesses do not know exactly how old their alarm dialler is. Often, the age of the device is only discovered when the system malfunctions and is sent for repair. 'It still works' shouldn't be a reason to have your assets, with a value of many thousands or even millions, protected by equipment that may be 15 years old or even older.

In order to avoid compromising the safety of your highly critical processes, livestock or crops, we strongly recommend that you replace your old device by a newer type. This concerns the telephone alarm diallers and modems of the following series:

- Modalarm-D
- Modalarm 1200D
- Modalarm-T
- Octalarm (1st generation)
- Octalarm 2 (2nd generation)
- Octalarm-T series (T1 t/m T16)

Alarm dialler Cashback promotion:
prevent damage, replace your old device for the
Octalarm-Touch

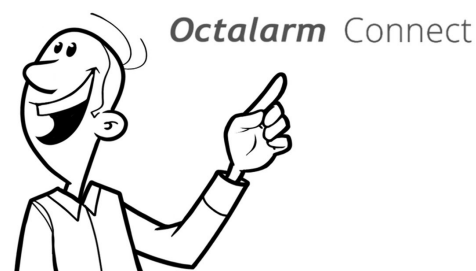

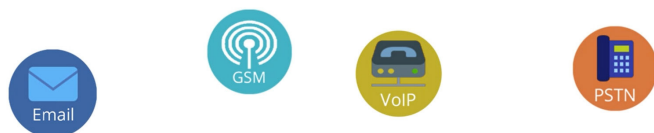

Invest now in the Octalarm-Touch and as an end customer you will receive € 100 cashback in your bank account. First, order the new alarm dialler from your installer and have your old device removed and the new one installed during a single visit. This ensures that you have a safe and reliable alarm dialler and it prevents a situation in which you are temporarily without an alarm dialler. After we have received your old device, we will transfer the amount to the bank account you specified.

Make the most of your new alarm dialler with
Octalarm Connect

The service Octalarm Connect* ensures that calls via mobile networks and VoIP are available immediately for low, fixed costs per month. Your installer can easily activate the supplied SIM card during the setup wizard. As a result, no firewall issues (VPN) occur and no manual email settings (SMTP) are required. Herewith, the alarm dialler works out of the box. This saves the installer a lot of searching and setup time!

- ✓ All in service for GSM and VoIP calling with KPN SIM card and 24/7 monitored Adésys servers
- ✓ Fully configured and ready for use right out of the box
- ✓ Monthly settlement via direct debit or credit card with end customer (€ 13,95 per month)

* Octalarm Connect only works in Europe.

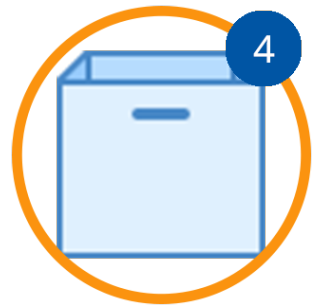

Order the Octalarm-Touch from your installer. He will take care of safe and reliable installation of the new alarm dialler.

Fill out the cashback form on www.adesys.nl/en/alarm-dialler-cashback-promotion and receive a confirmation of your registration via e-mail and / or use the form on the last page.

Print the confirmation or the last page of this brochure so you can send it to us.

Package the old unit TOGETHER WITH the cashback form (e-mail confirmation or the last page of this brochure) and address the package to Adésys. If you use the address Antwoordnummer 20124 (2290 WG Wateringen), we will pay the shipping costs.

Give the package to your installer, who will ensure the old alarm dialler is shipped to Wateringen, the Netherlands.

You will receive € 100 cashback in the specified IBAN bank account (account in the name of the end customer).
