## Acapela installation

Insert the Acapela World DVD and run AcaWizard.

Deselect all languages except the US English HQ (High Quality) voices, but leave all other checked items in their default state.

**Only install HQ voices!** 

Complete the installation.

After installing Acapela go to the installation directory. This will be:

*C:\Program Files (x86)\Acapela Group\AcapelaTTS* on a 64bit windows machine, and: *C:\Program Files\Acapela Group\AcapelaTTS* on a 32bit windows machine.

Execute the RegSapi.bat as administrator (right-click the file and choose: Run as administrator).

## Registration

Next the the Acapela voices must be registered. Click on the windows start button and start the License Manager.

In the license manager you will find a PC-based license Code

E-mail this code to info@adesys.nl. Adesys will send back a license file which can be imported using the License Manager. I will take some time before the license file will be send, because we will have to contact Acapela to get the license file.

## ARA

Once the Acapela language is registered, the voice will become visible in the ARA option menu.
